SGG COOL-LITE®
SKN 174/174 II

High performance solar control glass with advanced thermal insulation properties

Laminated versions now available
**Applications**

![Saint-Gobain Glass UK Ltd](https://example.com/saint-gobain-glass.png)

SGG COOL-LITE SKN 174 and SKN 174 II are two solar control coatings for use in residential or commercial buildings alike, either for façades or overhead glazing. Due to the unique properties of the coatings, they are ideally suited to applications requiring annealed and toughened or heat-strengthened glass.

**Description**

SGG COOL-LITE SKN 174 II forms part of the ever-evolving range of ‘to be toughened’ neutral solar control coatings from SAINT-GOBAIN GLASS.

In order to achieve its superior thermal properties, solar control properties and neutral appearance, SGG COOL-LITE SKN 174 II must always be toughened or heat-strengthened before assembly into a double-glazed unit (coating on face 2).

These two products are designed for use side-by-side within the same façade; SGG COOL-LITE SKN 174 in annealed form and SGG COOL-LITE SKN 174 II in toughened/heat-strengthened form.

**Benefits**

SGG COOL-LITE SKN 174 balances the advantages of a high performance and very neutral solar control product with:

- a high light transmission
- a very low g-value, which reduces solar gain by as much as 30% compared to standard thermally insulating glass
- an excellent U-value of 1.1W/m²K
- a high degree of neutrality both in transmission and exterior reflection

SGG COOL-LITE SKN 174 can be used to create more comfortable interiors by reducing overheating and the need for costly air conditioning, whilst at the same time noticeably reducing excessive heat loss.

SGG COOL-LITE STADIP SKN 174 is also available which adds the following benefits:

- Safety benefits – Helps protect against accidental and wilful damage.
- Security – Can achieve a P1A & P2A Accreditation for BS EN 356.
- UV filtration – To help protect furnishings from fading from UV light.

**Range**

SGG COOL-LITE SKN 174 is available in 6000mm x 3210mm dimensions, in 6, 8 and 10mm thicknesses (12mm available on request) allowing for over-sized high-specification units.

SGG COOL-LITE STADIP SKN 174 is available in 6.4mm up to 8.8mm with thicker laminates available on request.

**Instructions for use**

The technical performance and aesthetics of SGG COOL-LITE SKN 174 (annealed) and SGG COOL-LITE SKN 174 II (to be toughened/heat-strengthened) are identical. SGG COOL-LITE SKN 174 II can be toughened from stock enabling a quick turnaround for toughened/heat-strengthened double-glazed units. Together, these two coatings can be used to produce exciting and innovative projects within a short timescale. There is the additional advantage, therefore, of a short lead time for replacements.

**Technical Specifications**

**Performance Data**

- **Internal Pane**
  - SGG PLANICLEAR
  - SGG COOL-LITE SKN

- **External Pane**
  - SGG STADIP/SGG COOL-LITE SKN 174/174 II

**Composition in mm**

- Face 2
  - 6(16)6
  - 6.8(16)6

**Coating Positions**

- Face 2
  - LT: 68%
  - LRe: 11%

**U-Value**

- 1.4 W/m²K

**90% Argon**

- 1.1 W/m²K

**RW(C,Ctr)**

- 34(-2, -5)dB
