**Performance Levels**

- **1**: Year round comfort.
- **2**: Year round comfort with 1 other benefit of your choice such as enhanced solar control in the roof where it is needed most.
- **3**: Year round comfort with 2 other benefits of your choice such as self-cleaning glass and sound insulation reducing the effects of rain noise.
- **4**: Top of the range multi-functional glazing for the ultimate conservatory solution.
A conservatory should be a natural extension to the home providing useable, extra living space that can be enjoyed whatever the time of year.

SGG PLANITHERM 4S has been developed especially for conservatory glazing applications. Offering excellent solar control properties, reduced glare and enhanced thermal insulation SGG PLANITHERM 4S provides true year round comfort when used throughout the conservatory.

Consumers increasingly demand high performance conservatory solutions to suit modern lifestyle needs. It is no longer acceptable that such an important investment be unuseable for 9 months of the year due to excessively warm or cold conditions. A recent consumer study* showed that the 2 most important considerations when buying a conservatory were; thermal insulation and solar control. Of the 220 respondents, 71% said they would choose to upgrade to these premium functions.  

*Source: Ducker 2007

Results from a conservatory glazing study show that using SGG PLANITHERM 4S throughout can reduce peak summer temperatures by up to 13˚C when compared to traditional low-E glazing. Overall, the improved temperature stability throughout hot or cold periods has the potential to halve the energy required to maintain a comfortable environment all year round.

Responding to consumer demand

Keep cool in summer...

- For ROOFS when combined with our special dual-function self-cleaning and solar control glass
  - Heat Reflection 79%
  - Glare Reduction
  - Self-cleaning for hard to reach areas

If used alone in a DGU for SIDE WALLS
  - Heat Reflection 56%
  - Attractive Neutral Appearance

Keep warm in winter...

- Unbeatable thermal insulation
  - U-value of 1.0 W/m²K
- Less Heat Loss compared to ordinary double-glazing 63%
- Save £’s on your heating bills
- Cold spots and drafts reduced
- Reduced Condensation

Spring to Summer

Autumn to Winter
